A 29.5 credit-hour certificate program.

**D302
C301**

LTC prepares students to assume roles as entry-level operators and technicians in the process industry (food processing, power production, water treatment, paper, fuel, chemical and pharmaceutical production).

Successful graduates of this program have opportunities for employment in many aspects of production, including fuel, chemical and pharmaceutical processing.

This program seeks individuals who possess "hands-on" skills and are computer savvy. Graduates may also find themselves climbing tall ladders or working in cramped spaces. People who work well in a team, enjoy problem solving and are safety focused will do well in this program.

LTC has worked closely with area companies, including Marathon Petroleum, Lincolnland Agri-Energy LLC and Hershey Chocolate to develop the program. Many of our students have completed internships as a part of their studies.
